YEARS EXPERIENCE

70+

TRAINERS MANAGED

10,000+

STUDENTS IMPACTED

4

SYSTEMS BUILT

01 PROFILE

Training Manager and technology professional with 5+ years across training operations, academic delivery, and technology-enabled learning. Currently manages large-scale technical and aptitude training at a university campus, coordinating trainers, schedules, attendance, and curriculum delivery across multiple parallel programs. In parallel, works as a hands-on full-stack developer, building MERN-based platforms, automation systems, and AI-enabled tools that convert manual operational processes into structured software — most notably MBUTOMS, a training-operations system built directly from problems observed on the ground.

02 PROJECTS

MBUTOMS — Training Operations Management System

FLAGSHIP

Centralized platform built to run university training operations end-to-end — replacing scattered manual tracking with one system of record for attendance, scheduling, trainers, and performance.

Modules Dashboard & analytics, trainer management, attendance automation, subject & timetable management, venue management, classes & students, trainer leave, issue/ticket tracking, topic tracking, trainer performance, trainer replacement.

Stack React · Node.js · Express.js · MongoDB · REST APIs

Deploy <https://mbutoms.onrender.com/>

Outcome In active use as the operational backbone for 70+ trainers and 10,000+ students across the campus program.

Playground

DEV TOOL

Browser-based coding & developer environment in the spirit of CodePen — built to give students a live, multi-language execution sandbox for learning.

Capabilities Monaco editor, HTML/CSS/JS execution, React & Node/Express sandboxes, multi-language runner, Google/GitHub OAuth.

Stack React · Vite · Node/Express · MongoDB Atlas · AWS (S3, CloudFront, Route 53, EC2, PM2)

Outcome Cloud-deployed developer platform with production-style infra (CDN, DNS, process management).

StepWise

EDTECH

Interactive code-execution visualizer — "see the computer think." Traces Python, C, C++ and Java line by line and animates every variable, array, pointer, stack frame and heap object as the code runs.

Capabilities Monaco editor with live execution highlighting, shape-aware visualizations (arrays, linked lists, trees, graphs, dicts, recursion frames), scrubbable step timeline, adjustable playback speed.

Stack React (frontend) · Node.js/Express (backend) · web-tree-sitter (WASM grammars) · custom AST normalizer & interpreter runtime per language

Deploy <https://stepwiseviz.onrender.com/>

Outcome Working four-language tracer (Python, C, C++, Java) with a shared runtime core and backend test suites. Also built a complete course and assessment platform for Campuszen (SarkarTech).

WhatsApp Attendance Automation

AUTOMATION

Automation concept extracting trainer punch-in data straight from WhatsApp group images, removing manual attendance entry.

Flow WhatsApp image → extraction → trainer ID match → time/phone parse → attendance webhook → MBUTOMS

Outcome Structured, low-touch attendance capture feeding directly into the operations system.

SarkarTech

STARTUP

Own venture — converts ideas into web applications, with a focus on AI-enhanced coding, hackathons, and real-world project builds.

Role Founder

Deploy <https://sarkartech.in/>

Built Campuszen (practice.campuszen.in) — "Learn, Practice, Get Placed" training & assessment platform for coding practice and course delivery.

Outcome Platform for shipping AI-assisted application builds outside the day job.

03 EXPERIENCE

Training Manager / Campus Manager — FACE Prep

MBU Continuous Assignment Program · 2025 – Present

- Manage training operations across multiple academic programs, coordinating 70+ trainers and delivery for ~10,000+ students.
- Own day-to-day academic operations: trainer allocation, scheduling, attendance, compliance, and performance management.
- Coordinate with HR, management, trainers, and client stakeholders to resolve operational and academic issues.
- Identify process inefficiencies and design technology-driven fixes to cut manual work and improve visibility.
- Built and introduced MBUTOMS — a centralized operations portal now used for day-to-day delivery (see Projects).

CAREER PROGRESSION

2021 - 2023

Placement Expert

Trained students in Aptitude, Logical Reasoning, Verbal Ability, Soft Skills, and Fundamentals for placement readiness.

2024

DSA Trainer

Trained students in DSA while building hands-on MERN stack expertise through the latter half of the year.

2025 - Present

Manager

Promoted to Training Manager / Campus Manager, now pairing training operations with in-house tool building.

04 TECHNOLOGY

Languages

JavaScript, Python, Java, HTML, CSS

Backend

Node.js, Express.js, REST APIs

Cloud & Deploy

AWS EC2, S3, CloudFront, Route 53, SSL, PM2, Vercel

Tools

Git, GitHub, Cursor, VS Code, Postman

Frontend

React.js, Vite, Responsive Web Dev, Monaco Editor

Databases

MongoDB, MongoDB Atlas, MySQL, AWS RDS

Auth & APIs

Google OAuth, GitHub OAuth, Webhooks

DSA

Arrays, Linked Lists, Stacks, Queues, Trees, BST, Graphs, Searching, Sorting, Priority Queues, Hashing, Recursion

05 EDUCATION & PROBLEM SOLVING

Apr 2021

Bachelor of Engineering (Mechanical Engineering)

GCE Erode

LeetCode

Active Problem Solver

Arrays, linked lists, trees, graphs, and recursion — full history at leetcode.com/u/SagoSalman0268

06 AWARDS & RECOGNITION

Trainer of the Year — FACE Prep, Dec 2023

Employee of the Month — FACE Prep, Jul 2023

Applause Award — FACE Prep, Dec 2022

POSITIONING

Training Leadership + Software Engineering + AI/EdTech — a technology-oriented training leader who pairs hands-on management of large academic operations with practical automation and AI-powered product building.
